NiHo: High stacking under low roof

EXV 10 - EXV 14 C High Lift Pallet Truck
Power meets innovation

EXV 10 - EXV 14 C High Lift Pallet Truck
Detailed Photos

Tangibly better: control elements can be easily differentiated by their tactile characteristics

Best suited to ramps: initial lift helps the EXV drive up ramps with ease

Optional initial lift gives greater ground clearance on uneven floors

Easy threading into the pallets: fast and precise operation thanks to rounded forks

Hands free: practical storage compartments and a writing pad with built-in clipboard

Unauthorised access not possible: Access authorisation by key, PIN code, chip or card

EXV 10 - EXV 14 C High Lift Pallet Truck

Power meets innovation

Optimum utilisation of storage area: high storage compaction due to high residual load capacity

Always safe with OPTISPEED: Travel speed adapts to tiller angle

Impressive reloading of pallets: fast operation due to compact dimensions

Everything you need to know about EXV pallet stackers fitted with unique OPTISPEED tillers. The speed of this manually guided warehouse assistant is automatically modified depending on the distance between the operator and the truck. The control elements of the tiller are not only equally suited to left and right-handed operators, but the operator does not even have to look during operation: all of the push buttons can be easily differentiated from each other without looking due to their tactile characteristics. They also can be reached comfortably with one hand without grasping.

And as if that wasn't enough: the truck is particularly impressive on ramps due to its stability and automatic stopping capability whenever the tiller is released. Sophisticated lower damping which smoothly slows down the lowering speed shortly before floor contact, protects goods during the storage processes. The EXV makes it possible for goods to be more densely packed in storage and easily removed than ever before. Its high residual load capacity and extraordinary mobility make this compact pallet truck unbeatable when it comes to moving a large quantities of goods quickly and safely in confined spaces using a manual device – regardless of being moved around the pre-storage area or placed onto shelving.

Extensive Equipment

Power

- Enough power for multiple shifts: high battery capacity and optional lateral battery changing
- Extreme availability: the lithium-ion battery possesses incredible energy and allows for quick and easy interim charging
- Optimum utilisation of storage area: high storage compaction due to high residual load capacity
- Powerful, reliable and low-maintenance AC drive motor
- Impressive reloading of pallets due to excellent battery capacity

Precision

- Compact and mobile: gets to work effortlessly in confined spaces and narrow aisles
- Two drive programs for extreme accuracy – ECO and BOOST
- Exaktes Arbeiten auch auf engstem Raum: Feinfühlige Hub- / Senkbetätigung und optionale Schleichfahrtfunktion möglich
- Protection of the transported goods due to lower damping and precise lifting and lowering steering
- Fast and precise operation thanks to rounded forks for easy threading into the pallets

Ergonomics

- Non-fatiguing operation thanks to ergonomically optimised control elements, which are suitable for both left and right-handed operators
- Fast operation, without needing to look at the buttons: buttons can be clearly differentiated by their tactile characteristics
- Optional lateral battery change for even greater availability

Compactness

- Impressive reloading of pallets: fast operation due to compact dimensions
- Extremely mobile due to short and narrow design

Safety

- Always safe out and about due to tiller angle-dependent speed: speed is automatically modified depending on the distance between the operator and the truck (not possible with EXV Basic)
- Safe operation in every situation due to perfectly positioned and sensitive impact plate
- Always the best view of the load and prongs thanks to wide mast
- Excellent driver safety due to automatic braking when tiller is released
- Safe operation even in confined spaces: curved tiller shape protects the driver from getting trapped in front

Environmental Responsibility

- Low operating costs: low energy consumption and long maintenance intervals
- Energy efficient due to energy recovery when braking

NiHo: High stacking under low roof

EXV 14 - EXV 20 High Lift Pallet Truck Detailed Photos

Safety in production: depending on tiller angle, speed is automatically adapted to the distance between the operator and the truck

High availability: compact, robust frame design ensures durability

Everything in view, all the time: colour display with a range of language-independent symbols shows you all of the important functions at a glance

Precise in all situations: creep speed also makes it possible to manoeuvre in the most confined of spaces

STILL free view mast always ensures the best view of the tips of the forks

Optional initial lift gives more ground clearance on uneven floors

EXV 14 - EXV 20 High Lift Pallet Truck

Power meets innovation

Optimum utilisation of storage area: high storage compaction due to very high residual load capacity

Everything in view, all the time: colour display with a range of language-independent symbols shows you all of the important functions at a glance

Always available: battery capacities of up to 375 Ah enable long periods of operation

Stronger and more intelligent than the rest – that's the STILL EXV 14-20 high lift pallet truck. Two of its stand-out features are its huge residual load capacity and its smart colour display. The latter provides the operator with basic information, the truck status or the battery's state of charge at a glance at all times, and different language-independent symbols provide optimum support in operation. The smart and extremely mobile warehouse organiser moves pallets weighing up to 2,000 kg quickly, safely and reliably. It can achieve unprecedented reloading of pallets thanks to its powerful and low-maintenance motor and its precise control elements, which are suitable for either left- or right-handed operators.

The letters EXV are not, however, just synonymous with quick goods handling, but also with safe goods handling. The optional load capacity display shows what is possible. The curved tiller shape and the sensitive impact plate protect the driver, and the EXV stops automatically when the tiller is released – even on ramps. The OPTISPEED tiller also adjusts the speed of the EXV to the distance from the operator, while the Curve Speed Control system regulates the speed around bends. This high lift pallet truck, which is as strong as it is smart, allows you to always keep your flow of goods safely under control; from transporting loads within the pre-storage area to operating the shelving system.

Extensive Equipment

Power

- Optimal utilisation of storage space: high storage compaction due to very high residual load capacity
- High reloading performance: powerful, reliable and low-maintenance electrical drive and steering motor
- The right driving programme for all situations: Select maximum turnaround or maximum efficiency: ECO, BOOST or Blue-Q
- Performance boost in production: very high lift and sink speeds
- Brings power to the floor effectively: new chassis ensures optimum traction at all times

Precision

- Fatigue-free operation: precise and intuitive electrical steering unit
- Precise operation even in the most confined spaces: sensitive proportional valve control and optional creep speed function
- Best views for precise operation: free view mast and centrally mounted tiller ensure clear view of the tips of the forks
- Reliable, even in narrow spaces: compact dimensions and high manoeuvrability

Ergonomics

- Ergonomic and intuitive operation: driving, lifting and steering processes can be simultaneously controlled by left- or right-handed operators using just one hand
- Battery changing made easy: optional lateral battery change for even greater availability

- Easing of workload: easy to operate, ergonomically shaped STILL tiller head

Compactness

- Impressive reloading of pallets: compact size allows for quick and safe operation
- Additional storage space for goods: copes with narrow aisles thanks to its compact dimensions and high manoeuvrability

Safety

- Safety in production: OPTISPEED tiller adapts speed automatically depending on distance between the operator and the truck
- Safety in mind: optional load capacity display shows the operator the current mast height and associated residual load capacity at all times
- Safe around corners: Curve Speed Control automatically adapts the speed when cornering to the steering angle

Environmental Responsibility

- Blue-Q efficiency mode allows energy savings of up to 7 per cent at the press of a button with no loss of performance
- Very few noise emissions due to extremely quiet drive and lifting motor
- Over 95 percent of all materials used are recyclable
- ECO driving programme: maximum energy efficiency at the touch of a button
